

WALLACE & HINZ BROOKLYN PORTABLE BAR

8' Model
shown in oak
with optional backbar

8' Model
shown in mahogany

An innovative and cost effective solution for your banquet facilities.

The Brooklyn Portable Bar has a beautiful solid wood exterior and a functional stainless steel modular interior.

The solid wood exterior is built with handcrafted construction techniques, which allows it to be refinished, when necessary, during its long life.

If, somehow, it becomes damaged beyond repair or you choose to change the style of your bar, the entire wooden portion can be removed, refinished or replaced without having to buy a completely new portable bar.

The stainless steel interior can be configured to provide various types of portable liquor service. This unit has been designed to accommodate conventional service using soda cans or bottles, or may easily be configured to handle pre-mix (canister) or post-mix (bag in box) soda service when the volume of business dictates the cost savings of those methods.

An integrated protective bumper in the service top protects the edges while maintaining the overall beauty of the exterior. The integrated speed rail locks to permit inventory of liquor while also maintaining a standard doorway clearance without removing the speed rail.

The Wallace & Hinz Brooklyn Portable Bar can be the last portable bar you will have to buy.
